## Declaration of Conformity –REACH

(Regulation regarding registration evaluation, permits and restrictions of chemical substances)

### Dear customers of Kronospan Zvolen

On a 1<sup>st</sup> June 2007 the Regulation (EC) 1907/2006 (REACH) entered into force. Hereby, we would like to confirm that our company is well prepared regarding a new regulation and obligations hereunder.

In order to determine the status in relation to the REACH Regulation we have prepared an overview of all applicable chemical substances preparations and products and its origin. According to the criteria of REACH, our company regardless of the substances under consideration, has the status of a further user and the status of the manufacturer or importer of the products from which, in normally conditions are not released any substances. Due to our status, under the REACH Regulation pre-registration and registration of chemical does not concern us directly.

Despite this, we regularly review our status under the REACH Regulation, in order to guarantee our customers the best service. Therefore, we work closely with our suppliers of raw material and we make sure that all substances that we use for production, are properly initially and eventually recorded.

Our products do not contain any substances which, in accordance with the current list of Annex XIV and Annex XVII of the Regulation 1907/2006, shall be reported and are subject to the restrictions. If substances were included in our product, they would have to be included in "The lists of substances requiring notification - in accordance with Annex XIV, or be subject to restrictions accordance with Annex XVII of the Regulation 1907/2006" and its participation in specified limit of 0,1% by weight would be exceeded so, in that case, we would report it immediately. Our plant regularly checks the so-called candidate list of substances with a very high concern, which is published in accordance to the art.59 par.10 of the REACH Regulation. Our products do not contain substances included in the above mentioned list.

Consequently we collect and check all the information from our suppliers, so that we can provide them to you, if needed.

In Zvolen 2.1.2025

Regards,
